

CAMERON ANGELERI

+1 509 995 0242 | Seattle, WA 98109 | cam.angeleri@gmail.com | [LinkedIn URL](#) | [Github URL](#) | [Portfolio Site](#)

PROFILE

Accomplished full-stack engineer and technical project leader with a demonstrated history of designing and scaling high-performance data systems in fast-paced, dynamic environments. Proven ability to lead international, cross-functional teams to deliver robust, user-centric solutions that drive business growth and operational excellence. Expertise in architecting scalable backend services, automating complex workflows, and optimizing data pipelines to support machine learning initiatives and enhance product quality.

Thrives equally in fast-moving startup cultures and structured, established company settings, adapting quickly to evolving priorities and driving cross-team collaboration to meet ambitious goals. Experienced working effectively across remote, hybrid, and in-person environments, leveraging strong communication and project management skills to maintain alignment and productivity. Skilled in Agile frameworks, strategic resource management, and stakeholder collaboration to align technical execution with organizational objectives. Proficient in JavaScript, Python, React, and Flask, with a strong focus on continuous process improvement, innovation, and fostering diverse and inclusive teams. Passionate about leveraging emerging technologies to build impactful, scalable products and engineering operations.

TECHNICAL SKILLS

Languages: Python, JavaScript, C#, HTML, CSS, SQL

Web Scraping: Scrapy (expert), Proxy Management (Teleport), Anti-Bot Evasion, Large-Scale Data Ingestion, Data Normalization

Frameworks/Libraries: React, Flask, Node.js, Express, Tailwind CSS, Bootstrap

Databases: MySQL, MongoDB, NoSQL

Dev Tools & Platforms: GitHub, VSCode, AWS (S3, EC2), Notion, Slack, Google Workspace (Docs, Sheets, Drive)

Design & Prototyping: Figma, Canva, Adobe Creative Suite

CRM & Business Tools: Salesforce, Microsoft 365

Data Structures & Optimization: Bloom Filters (deduplication at scale), Caching Strategies, RESTful API Design

Other: Agile/Scrum, Stripe Integration, SEO

PROFESSIONAL EXPERIENCE

Loti — *Backend Engineer Intern* → *Web Scraping Engineer, Adult Content Department Head* | *Remote (Seattle, WA)* | *September 2024 – Present*

- Designed and maintained scalable backend services using Python, deploying components on AWS with S3 for storage and data handling.
- Promoted to lead Web Scraping Engineer, directing scraping operations across 200+ adult content domains.
- Scaled ingestion pipelines by 10× to handle an average of 25 million new items daily, significantly improving data availability and boosting downstream ML model accuracy by reducing noise and increasing unique item yield.
- Developed custom bots with Scrapy, leveraging Teleport for proxy and version management, along with anti-blocking measures across diverse web environments.
- Built fault-tolerant systems to ensure uptime despite aggressive rate limiting and dynamic site architectures.
- Implemented structured workflows for metadata enrichment, content deduplication using Bloom filter integration, and normalization for downstream use by machine learning teams.
- Coordinated with cross-functional teams using Notion, Slack, GitHub, and Google Sheets for documentation, communication, version control, and analytics reporting.

Sales Development Representative — *DocuSign* | *Hybrid (Seattle, WA)* | *August 2023 – March 2024*

- Prospected and qualified inbound leads, tailoring outreach to enterprise and SMB clients.
- Worked cross-functionally in Agile environments to align technical and sales objectives.
- Used Salesforce CRM for lead management and pipeline tracking.
- Partnered with account executives to close high-impact deals, contributing to record pipeline growth.

Trauma-Informed Yoga Instructor — *Self-Employed* | *Hybrid (Seattle, WA)* | *July 2022 – Present*

- Built and launched a successful e-commerce website, reaching profitability within six months.

- Delivered trauma-informed yoga sessions focused on healing and mindfulness.
- Utilized a cloud-based CRM to streamline client onboarding, scheduling, and retention.
- Provided 1:1 coaching to help clients achieve personal wellness goals.

Lead B2B Account Manager — *Williams Sonoma Inc. | Seattle, WA | January 2020 – July 2022*

- Led a \$5M corporate rebranding effort, ensuring seamless execution across marketing, product, and sales teams.
- Conducted daily stand-ups and training sessions to enhance sales team performance and client outcomes.
- Mentored 10+ sales associates, driving a 150% increase in B2B sales.
- Managed a portfolio of 500+ client accounts with a high customer retention rate.

Home Stylist / Key Holder — *Williams Sonoma Inc. | Seattle, WA | March 2018 – January 2020*

- Managed \$1.2M in annual sales, contributing to a 2% YoY market growth.
- Created seasonal marketing materials and product displays, increasing average transaction value by 10%.
- Produced visual content using Adobe Creative Suite, resulting in a 7% boost in social media traffic.
- Earned 1,200+ 5-star client reviews and national recognition for retail excellence.

TECHNICAL PROJECTS | [Portfolio Site](#)

Loti Web Scraping Platform | Scalable Data Pipeline & Automation System | *Private Repo*

A high-performance scraping architecture designed for ingestion of adult content metadata at global scale.

- Engineered and scaled ingestion pipelines 10× to process over 25M new items/day across 200+ domains. Automated scheduling and scraping cycles using custom job management scripts and cron-based orchestration.
- Led an international engineering team to standardize anti-bot evasion, proxy rotation, and version-controlled spider strategies.
- Integrated Bloom filters for scalable deduplication and normalization of raw data for downstream machine learning.
- Built robust error handling, logging, and retry logic to ensure continuous uptime despite dynamic site changes and rate limits.
- Established collaborative workflows across time zones using GitHub (version control), Slack (team sync), Notion (documentation), and Google Sheets (data QA tracking).

Angeleri Art Museum | Full-Stack Application | [\[GitHub Link\]](#) | [\[Deployment Link\]](#)

A single-page application (SPA) showcasing artworks from the Metropolitan Museum of Art, with a focus on accessible design.

- Developed a responsive and interactive interface using React and PrimeReact.
- Integrated with the Metropolitan Museum of Art API to present detailed artwork data.
- Implemented accessibility features including large font mode, high contrast mode, and screen reader compatibility.
- Deployed via GitHub Pages with responsive design for optimal mobile use.
- Designed a high-contrast UI/UX to improve usability for visually impaired users.

Dream Market | Full-Stack Application | [\[GitHub Link\]](#)

A Flask e-commerce app showcasing a fictional soda line, emphasizing frontend polish and smooth mobile UX.

- Built a mobile-first interface using HTML, CSS, and JavaScript.
- Integrated Stripe for secure payment processing.
- Created admin tools for managing inventory and orders with Flask and MySQL.
- Enabled customer support via Flask-Mail contact integration.
- Applied Agile practices and GitHub version control throughout development.

EDUCATION

Full-Stack Coding Bootcamp — *Coding Dojo | Seattle, WA | March 2024 - June 2024*

Graduate Studies in Ballet Performance | Pittsburgh Ballet Theatre | Pittsburgh, PA

Pittsburgh Ballet Theatre Pre-Professional High School Finishing Program | Pittsburgh Ballet Theatre | Pittsburgh, PA
