TECHNICAL PROJECTS | [PORTFOLIO SITE](#)

ANGELERI ART MUSEUM | FULL-STACK APPLICATION | [\[GITHUB LINK\]](#) | [\[DEPLOYMENT LINK\]](#)

A SINGLE-PAGE APPLICATION (SPA) SHOWCASING ARTWORKS FROM THE METROPOLITAN MUSEUM OF ART, WITH A FOCUS ON ACCESSIBLE DESIGN.

- Developed a responsive and interactive user interface using React and PrimeReact to display artwork information.
- Integrated with the Metropolitan Museum of Art API to fetch and present detailed artwork data.
- Focused on accessible design, implementing features such as large font mode, high contrast design, and screen reader compatibility.
- Deployed the application using GitHub Pages, ensuring it is mobile-friendly and easily accessible.
- Designed a beautiful, high-contrast interface to enhance the user experience for all users, including those with visual impairments.
- Created an interactive UI/UX that allows users to easily navigate and explore the art collection.

PETMATCH | FULL-STACK APPLICATION | [\[GITHUB LINK\]](#)

A TINDER CLONE DESIGNED TO CONNECT POTENTIAL PET ADOPTERS WITH RESCUE ANIMALS IN THEIR AREA THROUGH A USER-FRIENDLY INTERFACE AND ROBUST BACKEND.

- Developed a user registration system using Node.js and Express to handle authentication and authorization.
- Integrated the application with the Rescue Group API to fetch and display information about adoptable pets in real-time.
- Implemented a dynamic New Pet Owner wall using MongoDB for database management, allowing users to post questions, comment on posts, and like posts, supporting many-to-many relationships.
- Designed and built a responsive front-end with React, enhancing user experience and engagement.
- Optimized database queries and interactions to ensure fast data retrieval and smooth performance.
- Collaborated with a team using GitHub for version control and Agile methodologies for project management.

DREAM MARKET | FULL-STACK APPLICATION | [\[GITHUB LINK\]](#)

A FLASK APPLICATION FOCUSING ON FRONTEND DESIGN AND MOBILE-FRIENDLY USER EXPERIENCE, SHOWCASING A PRODUCT LINE OF STABLE DEFUSED SODAS BASED ON COLORS.

- Developed the frontend with a focus on mobile-friendly UX using HTML, CSS, and JavaScript, featuring bright and engaging colors.
- Integrated Stripe for seamless payment processing, enabling users to purchase products securely.
- Implemented product management and display using Flask and MySQL, ensuring efficient data handling and retrieval.
- Created an admin user interface for managing products and orders, using MySQL for database management.
- Set up Flask-Mail to allow customers to reach out to the "owner" for inquiries, improving customer support.
- Presented the project to the graduating class, demonstrating the capabilities and features of the application.
- Utilized Agile methodologies for project management and GitHub for version control, ensuring efficient collaboration and version tracking.
